Fellow IEEE,
Fellow Royal Academy
of Engineering, UK

Professor of Power Systems
at Imperial College London

Why am I standing?

IEEE PES has shaped my career through 25 years of mentorship, challenge, and opportunity.

I'm standing to give back – by opening new doors for young engineers and growing the society through volunteer-led impact.

With the right vision, PES can drive action on equity, access, and global energy justice through its foundations and programmes.

Who am I?

Professor of Power Systems, Imperial College London

Led Multinational research collaborations in sustainable energy & smart grids.

Consultant to leading power service & equipment suppliers

Supervised more than 30 PhDs and published 160+ IEEE journal papers

My Volunteering for PES

Editor-in-Chief, IEEE Transactions on Sustainable Energy (2012–2017)

Vice President, PES Publications

Chaired PES Power System Dynamic Performance Committee (2023–2024)

PES Governing Board & Finance Committee

My Vision for PES

Position PES as the leading global network for engagement and collaboration in Power & Energy.

Develop educational programmes shaped for the future needs of the power sector.

Work with partners to make IEEE Standards globally compatible, driving innovation and net-zero technologies.

Strengthen the PES Young Professionals & Women in Power programs through mentoring, publications, and technical activities.
