

Peter Cheung Song

Electronics, all morning, don't forget the harmonics.

Almost crying, I'm honest, this robot keeps falling.

And now tell me, where's the beat? How to find it? How to cheat?

Is this real or fantasy? Can't find centre of gravity.

And now what... can I say? Apart asking for an A (star)?

I feel free and I feel young, and this is all thanks to Peter Cheung!

Peter Cheung...

Peter Cheung...
